Hi folks,

Please let me know if this works.

Surface Water Sampling:

EPA is conducting surface water sampling during the Intercontinental Terminals Company (ITC) response. The surface water samples are collected from multiple locations in Tucker Bayou, Buffalo Bayou and the San Jacinto River. The surface water samples are analyzed for per- and polyfluoroalkyl substances (PFAS), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), chemical oxygen demand (COD), and Oil & Grease. The results from surface water sampling are compared to the Texas Commission on Environmental Quality (TCEQ) surface water protective values.

To date we have found PFAS in every surface water sample analyzed for PFAS. The surface water samples taken from the confluence of Tucker Bayou and Buffalo Bayou have the highest concentrations of perfluorooctane sulfonate (PFOS) at approximately 3800 ng/L. Perfluorooctanoic acid (PFOA) concentrations found at the confluence are approximately 120 ng/L. These values are well above EPA's recommended drinking water advisory level. However, the advisory level is not applicable in surface waters which do not have drinking water use.

[Thanks so much.](#)

Olivia, Lisa, Jon, Phil and Taim – see email thread below. Office of Public Affairs is preparing for hearing. Need a high level statement regarding the sampling we have conducted and what we have found. We can state we have found PFAS vs (PFOA and/or PFOS).

Olivia and Lisa – FYI the sampling plan has been finalized. Jon, Phil and Taim are all working in the environmental unit in the REOC.

Hi Ronnie and Becki:

OPA is asking what samples have been taken and when we think the sampling plan will be finalized. (See highlight below) Is there an ETA on sampling plan we can provide?

Thanks!

Lahne

Lahne, I'll give you a call about this shortly. Also, can you let me know what samples

have been taken and when we think the sampling plan will be finalized? I'd like to make sure folks have it in their back pocket before Thursday's hearing. Thanks.
